

Ludacris PSA

What up everybody? This is Ludacris and I want to tell you about something that many of us don't want to talk about – HIV/AIDS and the toll it is taking on our community, especially young people. Now HIV isn't his problem or her problem, it's all of our problem.

The facts are clear, African Americans, especially young people, are being devastated by HIV and AIDS. But there is something we can all do about it. We can and must talk about HIV. So break the silence by having a conversation. Send a text. Update your status. Post this video. Talk about HIV and what we can do to prevent it. To get the facts visit ActAgainstAids.org.
