

Preventive Health and Health Services Block Grant

California

How California Invested PHHS Block Grant Funding

Total FY 2015 Funding: \$9,385,579

Picture of a single Ebola virus.

Ebola Information Flows 24/7 Via the California Health Alert Network

State health departments use a Health Alert Network (HAN) system to send email and telephone alerts when there is a public health emergency. These alerts help make sure that all medical providers and first responders get the same information at the same time about diseases and public health emergencies. The California Department of Public Health used a portion of Preventive Health and Health Services (PHHS) Block Grant funds to expand the California Health Alert Network (CAHAN) in 2014.

CAHAN operates 24 hours a day, 7 days a week, 365 days a year. More than 37,000 people from state and federal government agencies, county public health departments, hospitals, medical offices, and city emergency medical services receive the CAHAN alerts. Most alerts have either detailed health information or instructions about what to do during a public health emergency.

After the first Ebola case was diagnosed in the United States in October 2014, California used CAHAN to share information and alerts about Ebola with medical and public health organizations across the state. More than 100 CAHAN messages were sent about Ebola between October and December 2014. The messages announced upcoming conference calls to discuss Ebola, how many people in California might have been exposed to Ebola when they traveled to West Africa, and which hospitals someone could go to if they thought they might have Ebola.

Because PHHS Block Grant funds supported the CAHAN system's expansion, health departments were able to share important information about Ebola across the entire state. Medical providers and first responders all received the same information at once and knew what was happening with Ebola in California. CAHAN helps to keep the public safe and saves health departments time, money, and resources when they are communicating about emergencies.

Preventive Health and Health Services Block Grant

2015 Top-Funded Health Areas

Excludes all non-discretionary funding: administrative costs (up to 10%), direct assistance, and funds set aside for sexual violence (rape prevention).

What is the PHHS Block Grant?

The Preventive Health and Health Services (PHHS) Block Grant provides flexible federal funding to 61 states, tribes, and US territories. These grantees use the funding to meet vital public health needs within their jurisdictions that align with national priorities—the Healthy People (HP) 2020 objectives.

Block Grant Investment Across the Nation

In fiscal year 2015, the 61 grantees received about \$126 million from the PHHS Block Grant to support critical programs and services. Most funds (85%) supported HP 2020 objectives in 10 key areas: 1) Public Health Infrastructure, 2) Education and Community-Based Programs, 3) Injury and Violence Prevention, 4) Nutrition and Weight Status, 5) Heart Disease and Stroke Prevention, 6) Environmental Health, 7) Immunization and Infectious Diseases, 8) Emergency Medical Services, 9) Oral Health, and 10) Physical Activity.

Public Health Infrastructure was the most funded area (26% of total funding); 43 grantees directed funds toward public health systems assessment, health improvement planning, accreditation, quality improvement, laboratory services, and other infrastructure activities. Education and Community-Based Programs was the second-most funded area (21% of total funding); 29 grantees directed funds toward community-based primary prevention services, worksite health promotion programs, and culturally appropriate community health programs.

Grantees also directed funds toward supporting local organizations working to improve community health (27% of total funding) and reduce health disparities (23% of total funding).
